STEEL TANKS WITH DIAPHRAGM

The MNP Series is designed for a wide range of applications, including hydropneumatic systems, booster systems, irrigation systems, and the reduction of water hammer effects.

MNP Series tanks, made of steel, have an internal lining constructed from virgin polypropylene and a chlorobutyl membrane, certified by the FDA. The membrane is affixed to the tank wall courtesy of a steel ring. A bronze valve, sealed with a plug and an O-ring, helps prevent air from escaping.

The external coating of the MNP Series tanks, with almond colored polyurethane paint on an epoxy base, provides hundreds of hours of protection against UV rays and aggressive environments.

Features

- Fixed Butyl membrane
- Stainless Steel water connection
- Internal lining in virgin polypropylene
- Finished with polyurethane paint on epoxy base
- Air-valve plug sealed with O-ring anti-leak
- Does not require maintenance
- Maximum Working Pressure: 150 PSI / 10 bar
- Maximum Working Water Temperature: 90 ° C
- IAPMO R&T, ACS, and CE Certifications
- Factory preloaded in Nitrogen (N2) for operation
- 100% Factory Tested

* MNPIS and MNP3S: 4 PIECES / CASE

Factory precharge pressure: 30 PSI / 2bar

Highly engineered plastic bases. Models MNP325V and MNP450V in steel.

In-line and horizontal models up to 80 liters with 3/4 "connection.

Place "R" at the end of the model.

Available in 16 bar.
